

WELDERS' CAPS

KROMER

In Kaukauna, Wisconsin, at the turn of the century, George Kromer, an engineer for the Chicago and Northwestern Railroad, decided that there was not available a single cap of quality materials and manufacture which suited the needs of railroad men. So he made one.

He and his wife together designed that the cap had to be 100% cloth with a soft flexible visor. It had to cling to the head despite strong gusts of winds that plagued rail hands everywhere. His wife, Ida added her own touches, a sweat band of absorbent cloth and an outside band which could be pulled down over the ears. This is how Kromer cap was born and each cap is individually inspected.

STYLE A Colourful new patterns join our market-tested favorites. ALL-COTTON balloon top, rugged double stitch construction and absorbent, cotton sweat band. Comfortable. Durable. Washable. Meticulously constructed and individually inspected in America, as are all of our caps, by skilled union craftsmen. Individually sized 6-5/8 through 7-3/4. MADE IN U.S.A.
