

SAFETY COVERALL

In any work environment that exposes individuals to the risk of flash fires or explosions, something that could potentially prevent a more serious burn injury or help to save a life is necessary. When seconds separate disaster from safety, flame resistant protective clothing just might be the difference that can save a life. We know that the wide range of flame resistant fabrics can be confusing to the end user confronted with so many different fabrics to choose from, all with their own advantages and disadvantages. Topps® works closely with fiber producers and textile mills in the development and evaluation of new flame resistant fabrics to give the wearers the best protection, comfort and practicality that these industries demand.

NOMEX® III aramid

NOMEX® Unlined Coveralls by TOPPS® now come with a quick release zipper.

Fabric:

100% DuPont NOMEX® IIIA
(93% NOMEX/5% KEVLAR/2% Carbon)

CONSTRUCTION FEATURES

NOMEX® is an inherently flame resistance anti-static fiber blend engineered to reduced "nuisance" static.

- Two large patch breast pockets are double stitched with NOMEX® thread.
- Strong front zipper will quickly release under pressure without damage to the zipper.
- Heavy duty brass zipper with NOMEX® zipper tape.
- Pleated bi-swing back adds extra room for stretching and reaching without binding.
- Pass-through pockets that snap closed when not in use.
- Strong, safety stitched construction with NOMEX® thread.
- Top and bottom joined with chain stitching on the outer belt and inner waistband.
- No metal exposed to skin.
- Collar is lay down style topstitched for an attractive, professional appearance.
- Utility/tool pocket double stitched to right leg.
- Thread riveted (bartacket) stress points and pocket corners for extra strength to resist ripping.
- Doublined needle crotch seam with reinforcing thread rivet (bartack) on fly.
- Double ply banded cuff construction with adjustable covered snap closure
- Pockets have extra carrying capacity.

SAFETY COVERALL

Characteristics: 100% cotton treated with a permanent flame resistant finish. INDURA® offers protection with the comfort and affordability of cotton. INDURA® is most popular in industrial applications and is effective protection against potential risks associated with welding and similar activities. INDURA® retains the beneficial properties of natural cotton for wearer comfort and absorbency. Topps® garments meet all requirements of the NFPA 1975 Standard on Station/Work Uniforms for Fire Fighters, 1999 edition. Topps® Flame Resistant Garments meet the performance requirements for protective clothing as governed by OSHA Rules 29 CFR, Part 1910.269 and ASTM F1506-1994.

PROBAN® is both a chemical and a quality controlled, technological process. Treatment takes place at the finishing stage of the cotton and cotton blended textile manufacture. The PROBAN® process involves chemical drying and curing with ammonia gas using a patented licensed technology, followed by oxidation and final neutralisation. The polymer formation process is irreversible. Embedded in the body of the fibre, the polymer is inert, completely insoluble and cannot be removed by washing. The only way to remove the polymer is through mechanical abrasion.

PROBAN INDURA®

FR Cotton coveralls from Topps® made of Indura® fabrics will retain their protective performance for the useful life of the garment when laundered under industrial wash conditions, as certified by Westex, Inc.

Fabric: 100% Flame Resistant Cotton Sateen.
Shirts : 100% Flame Resistant Cotton Oxford.

CONSTRUCTION FEATURES:

- Heavy-duty, 2-way self-locking brass zipper.
- Two covered stainless steel snaps (one at top of zipper and one at neck)
- Pleated, bi-swing back adds extra room for reaching without binding.
- Elastic waist at sides for comfort and trim fit.
- Two, big patch-style breast pockets, pencil holders slot in left pocket.
- Two extra large hip pockets with snap closure on the left hip pocket.
- Side openings with snap closure for easy access to pants pockets.
- utility/tool pocket on right leg.
- Safety stitched construction with NOMEX® thread on every seam.
- Durable, brass nickel plated snaps are set with double prongs through two layers of fabric for extra holding power.
- Top and bottom joined with four rows of two thread chain stitching on the outer belt.
- Thread riveted (bartacked) stress points and pocket corners for extra strength to resist ripping.
- Double needle crotch seam with reinforcing thread rivet (bartack) on fly.
- Double ply banded cuff construction with "V" opening and snap closure.
- Top stitching on collar for the finished look.
